## Guidelines required for "Chakra" mosaic design.

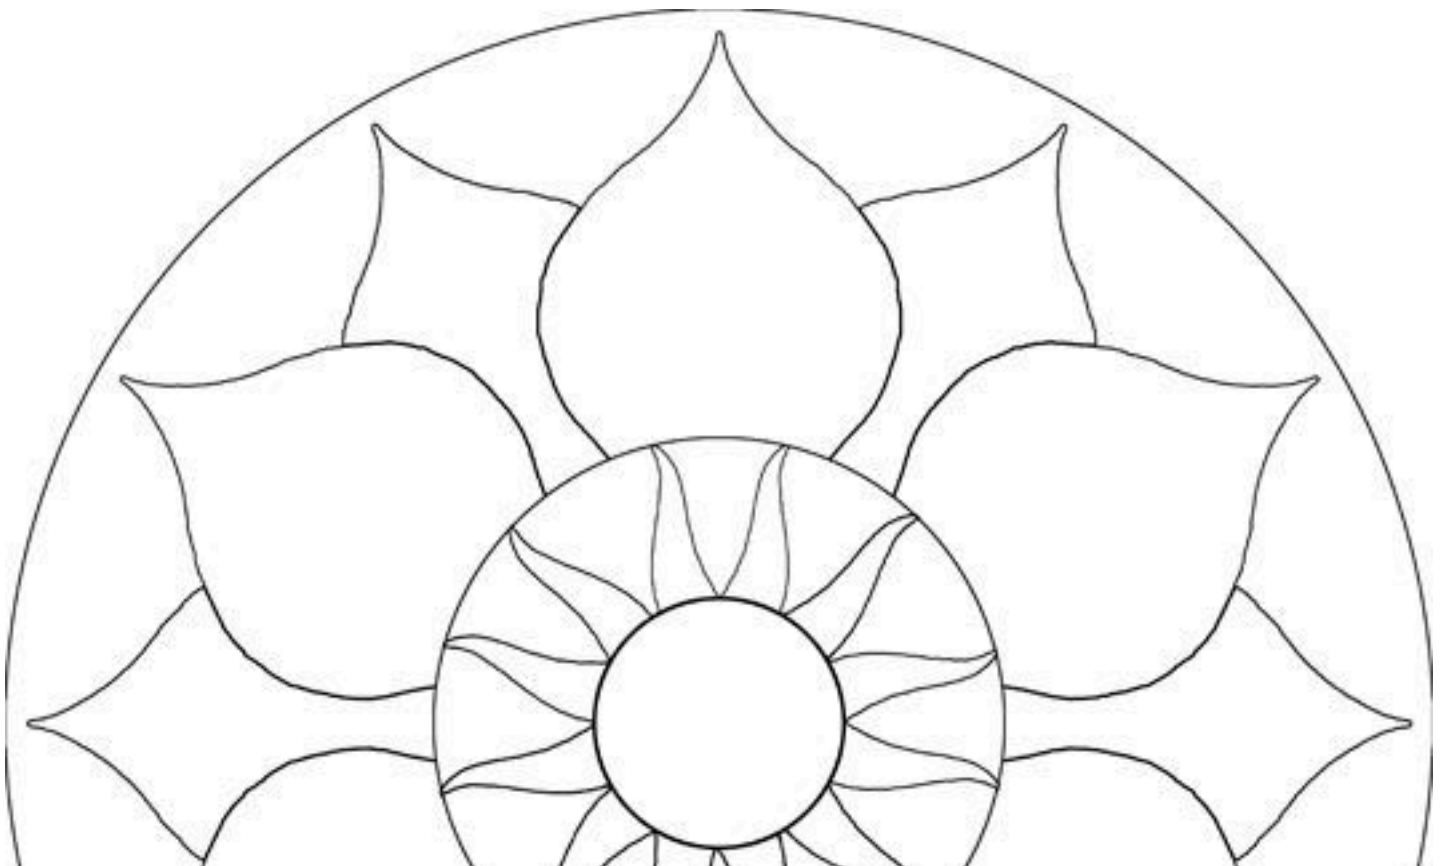

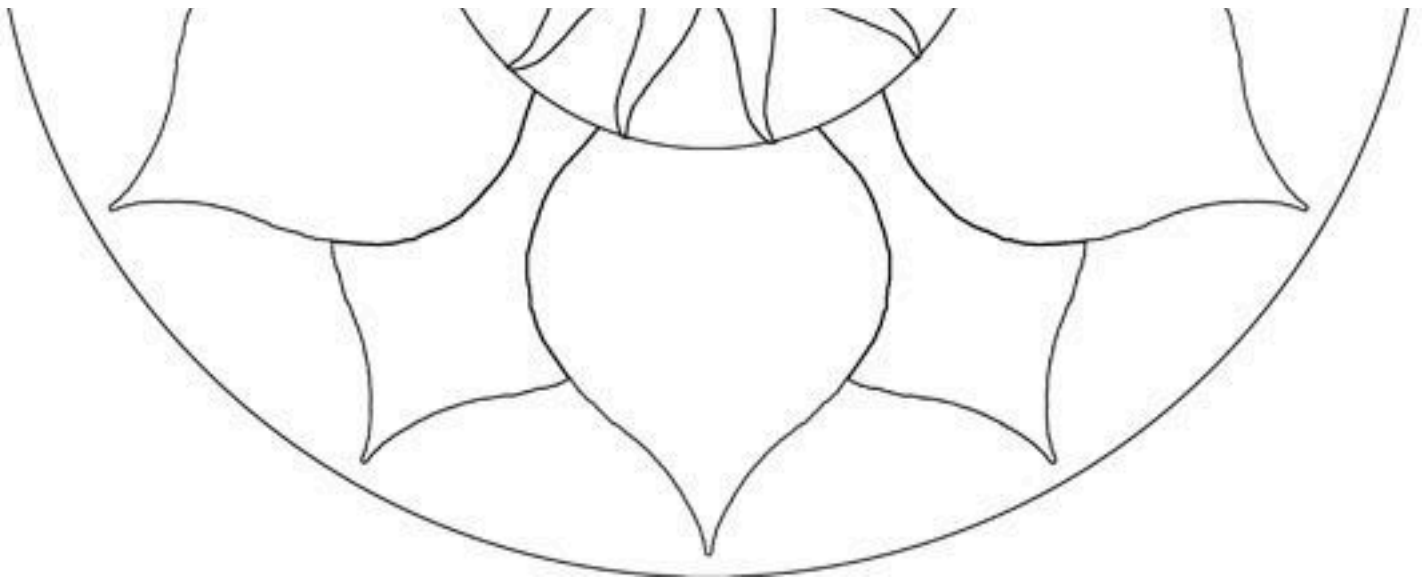

1. Draw lines as shown with a protractor & a compass
2. Carefully cut your templates out (cardboard page) with scissors or a stanley knife. Cut *outside* the lines edging the template.
3. Line up the petal template on the guideline as shown, tracing around it on every second section. Your mosaic lines will go outside this drawn section.
4. Then line the template up on the odd lines, and draw in your partly obscured petals.
5. Draw in the sun's rays by hand - one for each line.

### **Alternative methods of transferring the design**

The drawing below could be taken to a photocopy or print shop and enlarged to your desired size. You can then use carbon paper to trace the design directly onto your backing board.

You could also draw a grid on the design and a corresponding grid onto your backing board and draw the lines in yourself

**Suggested laying order**
