Tools

Required	**Desirable**
Curved edge tile nippers	Both curved & straight edged tile nippers
Grouting tool (or use something from around the house)	Boat Grouter

# Guidelines required for "Ruby" mosaic design.

1. Draw red lines as shown with a protractor & a compass

2. Carefully cut your template out with scissors or a stanley knife. Cut *inside* the lines edging the template.

3. Line up the diamond template on the guidelines as shown - you can use it to trace the sections of diamond on the edge too.

# Alternative methods of transferring the design

The drawing below could be taken to a photocopy or print shop and enlarged to your desired size. You can then use carbon paper to trace the design directly onto your backing board.

You could also draw a grid on the design and a corresponding grid onto your backing board and draw the lines in yourself

Suggested laying order
